1. Einordnung

Diese Tabelle stellt eine Ergänzung zur Ergebnisdarstellung des ADFC-Fahrradklima-Test 2020 dar.

Die Bewertung der Fragen im ADFC-Fahrradklima-Test erfolgt in Form einer sechsstufigen Skala zwischen zwei entgegengesetzten Antwortpolen ("semantisches Differential"), denen für die Auswertung Werte von 1 (linke, positive Seite des Fragebogens) bis 6 (rechte, negative Seite des Fragebogens) zugewiesen wurden. Während für das Ranking und den Städtevergleich die Mittelwerte dieser Bewertungen 1...6 verwendet werden und damit auch der unterschiedlich starke Grad der Zustimmung oder Ablehnung Berücksichtigung findet, sind für die Kommunikation einzelner Fragestellungen Prozentwerte oft eingängiger und damit besser geeignet. Gezählt wird nur der Anteil der Personen, die im Fragebogen auf der sechsstufigen Skala entweder einen der drei linken Punkte (d.h. Wert 1,2,3) angekreuzt haben und damit in ihrer Einschätzung eher dem positiv formulierten Statement des Antwortpols zugeneigt sind - oder einen der drei rechten Punkte (d.h. Wert 4,5,6) angekreuzt haben und damit in ihrer Einschätzung eher dem negativ formulierten Statement des Antwortpols zugeneigt sind.

2. Tabelleninhalte

Die Reihenfolge der Orte in der Tabelle entspricht dem Ranking der Städte gemäß der Gesamtbewertung in der jeweiligen Ortsgrößenklasse.

- Anzahl der Interviews und Rang Gesamtbewertung

Die Anzahl der Interviews oder auch Teilnehmerzahl ist die Zahl der in die Ermittlung der Kennwerte eingehenden Interviews. Sie stellen ein Maß für die statistische Basis der Auswertungen dar. Der Rang Gesamtbewertung gibt die Reihung der Orte nach der Gesamtbewertung ie Ortsgrößenklasse wieder (vgl. Haupttabelle).

- Ergebnisse der Einzelfragen des Fragebogens als Prozentwerte (pos./neg.)

Die Werte in den Spalten F1 bis F27 geben für die Fragen 1 bis 27 die Prozentwerte aller Teilnahmen für die jeweilige Stadt an. In der Teilspalte "pos." sind jeweils die Anteile der Zustimmungen zur positiven Seite (links im Fragebogen) aufgeführt, d.h. die Bewertungen 1,2,3 ("Top 3"). In der Teilspalte "neg." sind jeweils die Anteile der Zustimmungen zur negativen Seite (rechts im Fragebogen) aufgeführt, d.h. die Bewertungen 4,5,6 ("Bottom 3"). Die Angaben in der Tabelle beantworten die Frage, wieviel Prozent der Teilnehmerinnen und Teilnehmer mit ihrer Antwort der linken oder rechten Seite zugewandt sind. Prozentwerte über 50% sind zur besseren Sichtbarkeit hellgelb unterlegt.

Achtung! Aufgrund von Personen, die einzelne Fragen nicht beantworten wollten oder konnten, ergibt die Summe der beiden angegebenen Prozentwerte für eine Frage in der Regel nicht 100%. Die Differenz zu 100% ergibt also den Anteil der Nichtantworter ("Missings") im Datensatz. Für die Kommunikation der Frage, wieviel Prozent der Antworten der linken oder rechten Seite zugewandt sind, kann der Anteil entsprechend erhöht werden: Prozent positiver Antworten = Prozent positiver Teilnahmen / (Prozent positiver Teilnahmen + Prozent negativer Antworten = Prozent negativer Teilnahmen / (Prozent positiver Teilnahmen + Prozent negativer Teilnahmen + Prozent negativer Negativer Negativer Teilnahmen + Prozent negativer Negativ
